

Unique & Artistic

LIGHTS AND HOME ACCESSORIES

MADE BY

Bettina Huchtemann

Unique light sources for that feel-good factor

Thank you for your interest in my work and welcome to the world of my unique ShineOn pieces. Lighting plays a very important role in enhancing the beauty of your surroundings. My artistic, handcrafted lamps and furnishings will enrich your ambience, private and professional.

Their beauty creates a feeling of well-being and adds to the quality of your life. These eye-catching luminaires provide attractive light and add quality to their environment even when not illuminated. To produce them I make use of high-quality, handmade papers as well as objects found by chance and recycled materials. And the end result is environmentally-friendly lamps and furniture!

How the idea was born

My enthusiasm for haptically attractive papers and packaging began during my time in San Francisco/California. There I came across fine, handmade papers in Japantown. Just like fabrics such as silk or linen, these feel especially good to the touch. This passion later gave rise to the idea of combining organic materials and light, and then blending them in a meaningful way. The result is lighting which creates a cosy, relaxing atmosphere, adding beauty and warmth to the room. Each of my lamps is a unique, handcrafted item.

I chose the name ShineOn for my lamps, because their light nourishes the soul. The use of paper – in contrast to white plastic – ensures a warm, intimate light as well as surfaces which are pleasant to handle and both calm and inspire.

Sincerely, Bettina Huchtemann

Comfortable light you can feel

These artistic lights emit attractive, relaxing light. I build them up layer by layer in an elaborate process making use of countless pieces of organic, high-quality papers. In this way unique light sources emerge from natural materials. One particular effect of this multi-layering is that certain elements only become visible when illuminated, making each lamp a unique, individual piece.

Custom-made items can also be produced: lamps to suit your own existing interior, gifts for special occasions or individual pieces displaying your own personal or business logo.

Floor lamp „Calm“, on the left – behind it the matching „Calm“ ball light

Memories and dreams that shine

„Stamp lamp“ – instead of just lying around in an album, these stamps transform your lampshade into a shining eye-catcher, reviving memories of past journeys, distant shores and dreams sent from around the globe. The stamps nestle around the ball light which displays their colours to their best advantage when lit, depending on the illuminant. Have you got some interesting, attractive stamps on old postcards and letters? Let me make use of them to create an attractive object for you, in the form of a custom-made ball light, for example.

„Stamp lamp“ ball light

Arrive home, shoes off and lights on!

„**Calm**“ ball light – the companion to the floor lamp in violet and aqua tones is inspired by the colours of the south – nuances that have a calming effect and create a harmonious atmosphere. The lighting effect is adjustable: warmer or cooler, as desired, depending on the choice of illuminant.

„Calm“ floor lamp

Luminous accents

Add a touch of France to your home! These lights combine attractive motifs like chateaux and castles from paper bags with high-quality, handmade papers to create a lasting souvenir of your wonderful holiday. The light frame is flexible, so that the illuminant and the lampshade can be replaced easily. This lamp is particularly suitable for side and night tables.

I can design individual pieces for you based on this method, making use of any attractive paper products you care to provide.

And it's not just light sources: I can apply my technique to other furnishings too, such as mirror frames, chests of drawers, stools or chairs.

„Souvenirs de France“

Unique like you!

Floor lamps that provide discreet light and at the same time enhance their surroundings with high-quality, interesting materials which are pleasant to touch. Let me design one to suit your personal taste, in colours that match your interior. The following pages display my current range.

Lamps to light your imagination

Colourful accents highlight your personality and liven up your surroundings.

Are you looking for a unique piece for your home, reception area or waiting room? A gift for an important birthday, wedding or anniversary – or simply as a surprise for a favourite person? I'll create an individual design to match your ideas. Please contact me for a free, non-binding offer.

Artistic Table Lamps

Using natural materials helps to create a wonderful blend of interior and exterior. Elaborate designs, featuring hundreds of flowers, stamps or organic paper particles ensure that every single piece is special. Go on! Treat yourself to whatever takes your fancy! And in whatever different shape, colour and design you choose!

These cone-shaped luminaires, which look as if they belong in world of magic and fairytales, are supported by handmade feet, coloured copper or gold. The same is true of the small ball lights with a teak base – inspired by a 1960s lamp that I discovered. Stamps, flowers and leaves are displayed to their best advantage on the larger ball lamps.

Blue Light

The copper-coloured eyelets give the blue lamp its special charm. The openings also allow additional light to shine through.

„Hamburg with heart“ – a perfect gift for all Hamburg fans!

Hamburg is a cosmopolitan city, tolerant of other cultures and lifestyles. My logo design is based on an official Hamburg symbol, but features an open heart instead of a closed gate.

It was only when I was living far away from my hometown that I learned to fully appreciate it. This is my declaration of love to one of the finest cities in the world.

Lamps with this logo can be ordered from me in different colour combinations. They are available from 120 €, depending on complexity and design.

Table lamp

Ball light

Your logo in light form – an interesting eye-catcher

The charm of the paper adds appeal to your logo. Now it looks organic and attractive, not artificial. An illuminated logo, for example in a shop window, arouses curiosity and invites you to look more closely for other articles of interest. In this way potential customers will also register other products you have on offer.

Customer testimonials

These lamps are very beautiful to the eye and touch. They are especially well-made and give off a warm, pleasant light. The lamps create a cosy feeling in my living room and bedroom. The two lamps featuring leaves are particularly striking when lit, because the materials come from nature and provide a wonderful connection between the inner and outer world.

What I like most: This is real, honest craftsmanship and not the typical soulless stuff people tend to fill their apartments with nowadays. This is what makes the lamps so beautiful.

Dr. Christoph D., Berlin

For me, the lamps are simply a gateway to the world of fantasy: they expand my horizons until I find myself immersed in a new landscape which does wonders for my mood! Not so much for reading, but more to improve a room's atmosphere and make it more cosy.

Fernando N., Lissabon

What I like is the unique way the lamps are handcrafted from beautiful papers, their special glow, their aesthetic appearance, even

before they are turned on, as well as the wonderful design of the lampshades.

Gunda L., Hamburg

In the daytime, these lamps, with their interesting motifs, remain a decorative eye-catcher. Unlike normal lamps, these ones (art objects to me) beautify a room even before they're switched on. The light they spread in the evenings is so snug that you even find yourself looking forward to darkness falling!

Rooms lit like this look very cosy from the outside, making you really want to go in.

Michael S., Hannover

The light shed by these lamps is simply unique. You turn them on in the evening and the room seems transformed. The one with the newspaper-cuttings looks inconspicuous during the day, but as soon as it's turned on, it radiates the most beautiful light and becomes the focus of the whole room. Simply gorgeous!!! The one with the Hamburg logo always looks great – whether on or off.

Petra M., Hamburg

Pieces of furniture

„Painting with paper“ also applies here. With my collage technique I transform a mirror frame into an attractive wall decoration!

Mirror „Pink-Gold-White“
150 x 70 cm, 18,5 kg, 550 €

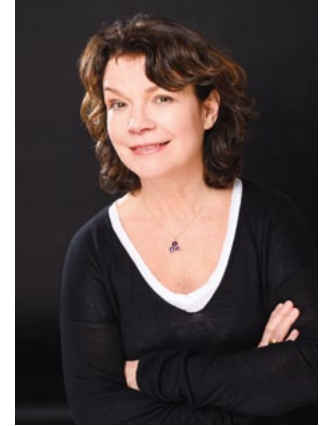

Theatre mirror „Cream brass“
150 x 70 cm, 18.5 kg. Sold.

Bettina Huchtemann

ShineOn – Illuminated Papers. It's like painting with paper. Collages for lamps and furniture are created from high-quality, organic papers and objects I find by chance, upcycled by reusing natural and sustainable material.

Born and raised in Hamburg, Germany, I studied Fine Arts and Graphic Design in the USA. After graduating, I worked for a year in various design agencies in San Francisco before returning to Hamburg. After 4 years in advertising (Team BBDO and Scholz & Friends, both in Hamburg), I became self-employed in 1986 and from then on shifted my focus to the cultural sector.

My work has been described as subtle, multi-faceted & sophisticated and covers a wide, colourful spectrum. In addition to the ShineOn paper collages, it includes graphic design, painting and photography.
